JAMSHID CT

JAVA FULL STACK DEVELOPER

http://jamshidct.me

jamshidct99@gmail.com | +91 9061819957

Malappuram, Kerala

SUMMARY

A highly skilled and innovative Java Full Stack Developer with 3 years of experience in creating and optimizing high-performance web applications. Proficient in Java, Spring Boot, React JS, Flutter, HTML, CSS, JavaScript, and MySQL. Demonstrates a proven ability to significantly enhance user engagement and drive revenue growth through cutting-edge development and strategic optimization.

SKILL SUMMARY

- **Languages :**   JAVA, SQL, DART, HTML, CSS, JAVA SCRIPT
- **Frameworks :**   Spring boot, React, Flutter
- **Tools:**   PostgreSQL, MySQL, Postman, Hibernate
- **Platforms:**   IntelliJ IDEA, Eclipse, Visual Studio Code
- **Soft Skills :**   Problem-Solving, Adaptability, Time Management

WORK EXPERIENCES

JUNIOR SOFTWARE ENGINEER
november 2022 – Present

Datafloat Technologies pvt ltd.

- Developed full-stack applications across various platforms using latest industry-adopted technologies and frameworks
- Developed and implemented robust and scalable software solutions using Java, Spring boot and Flutter, ensuring efficient and maintainable code.
- Implemented a robust search engine with radius and polygon search, as well as advanced filtering options for precise property targeting.

JAVA DEVELOPER INTERN
september 2021 – november 2022

GJ Global It Ventures pvt ltd

- Overcame significant technical challenges, including integrating with multiple payment gateways (RazerPay, Ezypay, Paytm, etc.), to successfully integrate these services with our Spring Boot-based fintech platform.
- Developed a microservices architecture using Spring Cloud to improve scalability and maintainability, reducing application downtime by 50%.
- Implemented a custom authentication and authorization mechanism using Spring Security to enhance data security and protect sensitive user information.

PROJECTS

PAYMENTO

Paymento is a B2B fintech application designed to provide businesses with a seamless and secure platform for handling various financial transactions.

- Developed and integrated key features such as Domestic Money Transfer (DMT), Mobile Recharges, and Micro ATM, including third-party payment gateway integrations. Also implemented comprehensive transaction reporting to enhance financial transparency and user engagement.

IDC CRM APP

IThe IDC CRM app is a mobile application designed to serve as a companion for real estate companies using the IDC Global platform. This app supports various CRM systems such as MyConnect, ONESuite, MyHub, The Vault, and more. It enables real estate agents to stay in touch with clients while on the go, track client interactions with agent marketing, and function as a mobile open house registration system.

- Successfully integrated agent onboarding, property search functionality, real-time chat with property buyers, and Google API services into the IDC CRM app, enhancing agent productivity and user experience.

REALTY ONE GROUP HOME SEARCH APP

The Realty One Group Home Search app is a powerful and user-friendly tool designed to enhance the home search experience. It allows users to search for properties for sale or recently sold in a convenient and efficient manner. Users can choose to search by Map View, which shows properties around their current location or within a custom-drawn boundary, or by List View, which allows for searches based on specific addresses, cities, states, and zip codes.

- Successfully integrated user onboarding, property search functionality, real-time chat with agents, Listing alert , enhancing user productivity and experience.

HMS – HOSPITAL MANAGEMENT SYSTEM

The software is designed to manage all daily activities of a hospital, including medical, legal, administrative, and healthcare workflows. It also digitizes all paperwork, streamlining operations and improving performance.

- I worked on the lab section, drugs stock management, and patient details section, ensuring efficient handling of laboratory data, inventory tracking, and accurate patient information management within the system.

E D U C A T I O N

BACHELOR OF TECHNOLOGY IN COMPUTER SCIENCE

College of Engineering, Kidangoor, Kottayam   *2017 - 2021*

R E F E R E N C E S

Sainu k   - UX/UI designer at Optum
